Fearful Scopes --- Excessive Brutality --- The Most Terrible Slaughter of Medera Times.

New York, August 22.—A special correspondent gives details of the atrocious Chinese massacre of the French and Prussian residents at Tientsin, China. It appears that the responsibility of the horrible butchery rests entirely with the Chinas are rests entirely with the Chinese su-thorities, and that the mob were not only cited by the Chinese Governor of the Province, but frequently arged the mob to commit the atrocities. Their ignorance and superstifion were worked upon by the most remarkable means, and official publications taught them to believe that the foreigners were in Tientsin to kidnap women and children, with the design of killing them and converting their bodies

into drugs.

A mob held possession of the French ettlement, maltreating all foreigners who were abroad, for two days before any blood was shed, and the Governor not only did not restrain or disperse if, but he even permitted his soldiers

less escaped a terrible fate. It is as-serted that over 200 Chinese prelates or priests were massacreed by the mob.
It is charged that Chung-how, the
Mandarin or Governor of the province, stood by and witnessed the mas-

sacre, without attempting to prevent it; and also, that J. O. T. Meadows, American Consul at Tein-Tsin, was in company with Chung-how all the time, and did nothing to prevent the terrible outrage, although he is an officer of the Chinese government, and had enough power and influence to prevent it.

dered, are too sickening to relate. Every cuelty, says the correspondent, which it was possible for the most savage barbarians to conceive of was practiced upon these defenseless Christian ladies. A native Christian priest, who attempted to guard the doors, was seized and torn limb from limb. Nine sisters, who were collected in a large school room, were beaten with sticks, their clothes torn from them, and, after this brutal and inhuman treatment they were cut with knives in a savage manner, and outraged. Yet alive, they were arranged side by side along the room, their cheeks gashed, lips and nose cut off, eyes scooped from their heads, thefr

cut off, and their 26domens ripped open with line cleavers, their limbs were cut and broken, and in ten minutes naught remained but their disfigured bodies. When there was no more to do, fire was applied and the buildings burned. Sixty or seventy children who had sought refuge from the mob, in the altar, were burned to death. The French cathedral, consulate, hospital and buildings of all the for- point between Basle and Mulhousan, signers were sacked and burned. The Shanghai News, the only American journal in Shanghai, says that J. O. T. Meadows, the American Con-

A few years ago mercury was given in almost every disease the physician was called upon to cape from his office without puncturing his veins and letting out a portion of his blood. This theory and practice was then considered right and fashionable, and yet we now know that it was so wrong as often to cost patients their lives.

\*\*\*Call personally, if possible to do so, for examination; the treatment can then be successfully conducted at home. Otherwise, write for a List of Questions.

All rge, boild and never-failing stream of water possing through a natural rock canal—the best blinty feet and the right bank to the feet high, of solid rock. The bed on bottom is also solid rock; the bed on bottom is also solid rock; the solid rock; the solid rock canal, with especity to dent to ourse, as of a fine peach or chard.

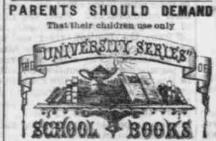

Here is a spiemble opening for capitalists to invest in the finest water power in the south, with all necessary buildings on the premises, ready built, large enough for spinning or waving, or both, if desired.
